**Our Company Mission Statement is to help our customers prolong and increase the value of their real estate by providing an excellent service that delivers quality and safety.**

## **THE COMPANY**

Roof Cleaning Systems Ltd's sister company Asbestostrip was founded in 1981 by Graham Gwilliam as an asbestos removal contractor, his son Richard joined in 1989. The company developed and then launched the Safestrip System (Red Box) to safely remove asbestos by controlled wetting of asbestos containing materials.

Asbestostrip Innovations Ltd was established in 1990 to market the Safestrip System and since then have become the recognised experts in the safe handling of asbestos. The Safestrip System is acknowledged as the world leading process.

We first used our innovative roof cleaning technology in 2002 to repair 1940's constructed buildings at UKAEA Harwell, Oxfordshire.

Roof Cleaning Systems Ltd (RCS) started in 2009 to focus on cleaning and coating asbestos cement roofs and have successfully completed numerous asbestos roof contracts. Since then we have further developed the process and our latest cleaning system enables us to work with approved contractors and coating companies to truly meet the needs of this market.

**Track Record - One Stop Solution - Expertise and Credibility - Safety - Quality - Values**

## **THE PROCESS**

### **Remove moss and debris**

#### **Clean roof**

- Using a shrouded high pressure cleaning head, which prevents the escape of asbestos fibres.
- Or wet down and hand scrape removing moss and lichen.

#### **Filter Contaminated Water**

- Contaminated water is collected via gutter.
- Pumped to RCS unique filtration unit.
- Water is filtered through four stages of filtration down to 5 microns (to remove asbestos and all particulates).
- Filtered/clean water can be recycled.

#### **Remove Asbestos Waste**

- Double bag filtered sludge.
- Transported to registered landfill.

#### **Remedial Works (if required)**

- Remove and replace skylights
- Install gutter linings

#### **Apply Coating**

- Ensure asbestos surface properly clean and dry
- Apply coating according to manufacturers specification

#### **Quality Inspection - with customer/coating representative**

- Job signed off
- Guarantee issued

# Examples of Projects & Testimonials

## UKAEA Harwell

**BEFORE**

**AFTER**

"The system we have been using means safer and better environmental practices in asbestos cleaning operations and extends the economic life of the building"

**Tony Khosla, Supervisor of the UKAEA's building maintenance at the B462 solid waste complex.**

## Mitcham

**BEFORE**

**AFTER**

## Tunbridge Wells

**BEFORE**

**AFTER**

As well as undertaking the cleaning and coating of asbestos cement roofs, we also provide separate services of roof repairs, cleaning, sealing or replacement of skylights, installation of Unifold gutter lining, gutter coating and mobile filtration.

At Roof Cleaning Systems we are committed to using high standards that will assure you of:

A quality repair that will significantly extend the working life of your building

A safe job that will protect your staff and contractors during and beyond the project

A "good as new" roof with a significantly increased lifetime
